ABOUT ME

Dynamic Software Test Engineer with nearly 3 years of hands-on experience in manual testing and a robust background in automation testing. Proficient in crafting and executing comprehensive test plans, detecting defects, and ensuring the delivery of top-tier software. I excel in collaborative environments, driving projects to successful completion. Eager to leverage my testing expertise and automation skills to make a meaningful impact in a progressive organization.

PROJECTS

At Bright UI Technologies, I worked as a Software Tester on a Railroad Software project in USA Railway Management, covering Asset Tracking, Inventory, Employee Management, and Automated Rail systems. I primarily performed manual testing to ensure functionality, integration, and regression, ensuring smooth operation before migration.

CLIENT HANDLING

In addition to my technical role, I handled client communication on a domestic project. I ensured the project aligned with client expectations, addressed concerns, provided updates, and met all deliverables, fostering strong client relationships and smooth project delivery.
